

GREENWAY ESTATE

GDS did the masterplanning and received DA approval for 311 Torrens Tilte lots over 5 stages, for this site in Richmond.

We were the superintendents from DA through to registration. This entailed contract administration, surveying and project management, delivery of sewage pump system, construction of a drainage basin, entry feature, parklands and a pedestrian bridge.

Major challenges overcome:

- Extensive creek rehabilitation
- Community park establishment
- Construction of a new Sydney Water pump station.
- Remediation of the site

Council: Blacktown Council
